

ENVIRONMENTAL POLICY

The company is committed to the care of the environment, by the continual improvement of its performance, pollution prevention and compliance with, or wherever possible exceeding, legal and other environmental requirements.

The Environmental Policy of Transbridge Freight Services Limited is:

Establish a management system that will be documented, implemented and maintained to enable effective environmental control.

Meet or exceed all the environmental legislation that relates to Transbridge Freight Limited.

Minimise toxic emissions through the selection and use of our transport and with the use of our power requirements

Continually improve the company's environmental performance through the establishment, achievement and regular review of environmental objectives.

Continually review installation processes to minimise adverse effects on the local environment.

Develop all areas of the business, including suppliers, in order to continually improve our environmental performance.

Actively promote re-use and recycling of all generated wastes both internally and amongst its customers and suppliers

Employ an environmental duty of care to our employees, customers, regulatory bodies, neighbours and other interested parties.

Communicate this policy to all employees and those working for or on behalf of the company.

Make the Environmental Policy publicly available on request.

The Environmental Policy will be taken into account, where economically feasible and practicable, when making financial and operational decisions.

The implementation of the Environmental Policy has the full commitment of the company at the highest level and the contribution of everyone is essential in achieving our goals.
